

VOYAGER

400 OR 600 GPD OF PURE WATER

ULTRA-QUIET
DC OPERATION

The Blue Water Voyager watermakers feature a smooth and nearly silent dual piston energy recovery pump to produce 16 or 25 gallons of pure water per hour (60 or 95 liters per hour). The system was engineered with today's cruising yachts that rely solely on DC power while away from the marina in mind. Automatic operation and an automatic fresh water flush make the Voyager a perfect fit for both owner operators and charter yachts.

HIGHLIGHTS

- Fully automatic operation
- Simple LCD screen controller
- Standard fresh water flush system included
- High rejection membrane for consistent water quality
- Available in 12V, 24V, 48V DC
- Quiet and reliable high pressure pumps
- Optional remote control
- Stainless steel vane pump
- Includes booster pump for increased filter life
